

Agile with JIRA

Date: 04-Oct-23

Tested By: Divyaa Sawant

Sprint: In Scrum, teams forecast to complete a set of user stories or other work items during a fixed time duration, known as a sprint.

Epic: A big user story that needs to be broken down. Created by Jira Software - do not edit or delete.

Story: Stories track functionality or features expressed as user goals.

The screenshot displays the Jira Backlog interface for the project 'Project1_Space Race Coders_079'. The left sidebar shows the project navigation menu with options like 'Backlog', 'Board', and 'Add view'. The main area shows the 'Backlog' view with a search bar and filters. A dropdown menu is open, showing options like 'Issues without epic', 'As user, verify products display correct details and ...', and 'Show epic panel'. The backlog items are listed in a table with columns for issue key, summary, status, and assignee. The first item is 'PSRC0-3 Verify user can view n' with a status of 'TO DO' and assignee 'S'. The second item is 'PSRC0-4 As a user, verify purch' with a status of 'TO DO' and assignee 'S'. The third item is 'PSRC0-1 As a user, verify registration with valid credentials' with a status of 'TO DO' and assignee 'S'. The interface also shows a 'Start sprint' button and a 'Create sprint' button.
